# OTM FEEDERS

OTM Ammunition Feeders

## Features

High Speed, Easy Set up & Economical Operation

The feed systems that OTM produces are some of the fastest and most economical in the ammunition industry. OTM make's 7 different models of feeders to ensure that we can meet your needs for feed rate and volume.

OTM feeders are different from any other feed systems in the industry, because we offer interchangeable caliber conversions. This allows the user to use the original base unit then purchase additional feeder wheels and discharge blocks for different calibers.

Our feeders can run anywhere from .380 ACP – 50 cal in the same feeder with a 5 – 10 min caliber changeover. All our components for our feeders are CNC machined which means holes always line up and parts fit as they should, which leads to ease of use and long machine life. All OTM feeders come with a 6-month limited warranty which starts from shipment date and covers the motor, hardware, electronics and malfunctions.

## Standard Models

- OTM-160A
- OTM-160B
- OTM-200A
- OTM-200B
- OTM-240A
- OTM-300A

## Feeder Stands & Accessories

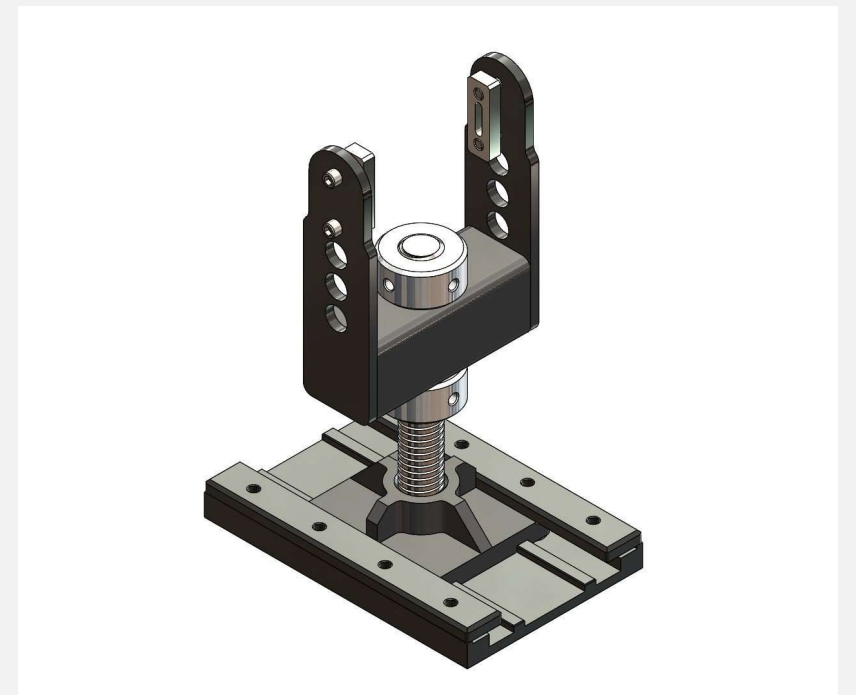

### Feeder Stands

Feeders can come with many custom solutions from complete enclosures to tabletop stands. We can custom design a solution that fits the need of any machine make or model. Spare tooling storage can be added to any feed system table to make your facility as organized as possible.

### Feeder Tabletop Stand

Most feeders are ordered with a tabletop or platform mounting system that allows you to adapt any feeder to any machine.

### Vibratory Hoppers & Elevators

Any OTM feeder can be outfitted with an axillary feed system. This will help you keep the feeder full and reduce machine stoppages due to lack of product.

# OTM FEEDERS

One System, Many Solutions

Feed Live Ammo

Feed Cases (Rifle or Pistol)

Feed Bullets (Rifle or Pistol)

Copper Jackets

Lead Cores

Various capabilities with one system making this one of the most flexible machines on the market. Other parts that can be fed include; partially drawn tubes, copper jackets, case cups, and more.
